Sorry, I misread that.

Yes, you are correct. AI's where we don't have methods or there's no tolerances for those commodities are not included.

Thanks for your (quick) responses.

On #3, I was referring to the active ingredient list in column A – whether it was a complete (static) listing of all the ai's in the CFR. But I think I've answered my own question. I'm guessing no, since I don't see ethylene oxide (180.151) or cacodylic oxide (180.311) – though it took awhile to find ones you didn't list. And I'd guess reasons for this would include you don't have a (chemical-commodity) analytical method or its tolerances are on commodities PDP wouldn't sample.

Hi Matt,

Here are your answers:

1. The explanation for the lettered footnotes is on the second tab of the spreadsheet. It is titled "Tolerance Expression"
2. Yes, FHEs are included. They are footnoted with a 10.
3. The commodities included in the table are for current PDP commodities. When a commodity leaves the program, it is removed from the table and the replacement commodity is added.

Let me know if you have other questions.

Best regards,

Hi Chris,

3 questions for you:

1. I can't seem to find explanations for the lettered footnotes (e.g., Vinclozolin^{CS})
2. Do you include food handling establishment-type tolerances? If not, do you have any rules/guidance for what you do and don't include?
3. Obviously the commodity columns is not the universe of commodities, but is column A all of the active ingredients in the CFR?

Thanks for your time,

Matt Crowley

Chris,

Thank you for sending this updated tolerance table out to us.

Have a good Memorial Day weekend!

David

Attached please find a copy of the revised PDP tolerance table for May 2015. Use of the tolerance table is strictly voluntary. The table includes U.S. tolerances and foreign MRLs, where available. Every effort has been made to include the most recent tolerance/ MRL for each specific pesticide/commodity pair. Kindly inform me if you observe any errors or omissions so that I may correct them promptly.
